Select List of Bulbs and Plants

25 at 100, and 250 at 1000 rates.

Agapanthus

(African Lily)

This is one of the handsomest plants in cultivation. It is naturally a summer-blooming plant, and admirably suited for parlor or conservatory decorations, being very attractive, with its glossy green foliage and large trusses of magnificent bloom.

A. umbellatus, fine blue, extra, 20c. each; \$2.00 per doz.

A. umbellatus albus monstrosus, large white, 25c. each; \$2.50 per doz.

Agapanthus

Amaryllis (Species of Hippeastrum)

It is impossible to name a more magnificent genus of bulbous plants than these. They are of the easiest possible culture and require but little care to throw up their beautiful trumpet-shaped flowers of the richest colors, from crimson to nearly pure white, lined and flushed with yellow, light rose, vermilion, dark red and purple. We recommend them with the utmost confidence for the decoration of conservatory or drawing room.

Belladonna major, large, dark rose and white, 20c. each, \$2.00 per doz.

Equestre, fine bright orange, margined white, with a green star, 15c. each, \$1.50 per doz.

Formosissima (Jacobean Lily), grand dark scarlet, shaded with numerous golden dots. It forces well and is certainly a real gem for frame and greenhouse, 10c. each, \$1.00 per doz.

Large Flowering Dwarf Cannas

Of these beautiful garden plants we need not say that a few of them should be planted by every lover of flowers; they begin to bloom soon after being planted, and continue until winter. We only grow a few of tried merit, discarding every year the poorer and replacing them with newer and better sorts.

Our Standard Dozen of Twelve Well-tried Varieties.

Admiral Schley, orange scarlet.

Allemania, dark salmon and golden.

Austria, fine, yellow, with few reddish brown spots.

Crimson Bedder, bright crimson.

Egandale, bronze foliage, soft currant red.

Gladiolus

Home-Grown Bulbs. In the very Best Sorts only

The gladioli are certainly the most desirable of our summer-blooming bulbs, throwing up their tall spikes of brilliant and showy flowers to a height of two feet and more. The flowers are of almost every desirable color; scarlet, crimson, purple, white, rose, yellow and white, blotched and striped in the most beautiful manner. They may all be grown out-of-doors in any common garden soil; are admirably adapted for grouping among evergreen plants, and are invaluable as cut flowers for bouquets and vases, every spike coming to full development to the last bud when placed in water.

Augusta, white, 6c. each; 60c. per doz.; \$4.50 per 100.

Gladiolus

Gloxinias

Most charming stove gesneraceous plants of dwarf habit, but producing large and splendid blooms in the greatest abundance under the commonest culture. Bloom continuously for months, and by starting at intervals, a succession of their splendid flowers may be had nearly the whole year round. They thrive best in sandy peat or loam, and require a plentiful supply of water.

Fine Seedlings, in all colors, mixed, \$6.00 per 100;
\$1.00 per doz.; 10c. each.

Gloxinia

Hemerocallis (Day Lily)

These beautiful perennials are perfectly hardy, and produce in June and July a profusion of orange and clear yellow lily-like flowers in large clusters. When once planted they will take care of themselves and certainly give entire satisfaction.

Distichia fl. pl., double orange-crimson, 8c. each; 80c. per doz.

Flava, sweet-scented, very nice, 6c. each; 60c. per doz.

Lilium

Lilies are the most desirable hardy bulbous-rooted plants in cultivation. In pots or anywhere in the open ground they are superb and produce a most charming effect. They should be planted from October to May, in good, rich, loamy soil, about four inches deep. After planting they require but little care, and should not be taken up for several years, as they bloom more freely than if taken up annually.

- Different Sorts**, mixed, 14c. per doz., 70c. per 100.

Ranunculus

Among dwarf flowers the *Ranunculus* is unrivaled for its lovely form and its brilliant and attractive colors—white, crimson, yellow, purple and black. They present nearly a round of the most gorgeous hues combined with compactness and symmetry unequalled in any other flower. The individual flowers are about two inches in diameter, beautifully imbricated, and as full and double as the finest camellia or rose. Their effect is truly magnificent in the spring flower garden, and they are very suitable for cut flowers. They must be planted in a moist and fertile soil, about two inches deep and three to four inches apart.
